
In Figure 3, “loose attention” was substituted for “content-only thr.” The correct figure is shown below.

Figure 3. Recognition contrast thresholds for the three crowding conditions as a function of flanker distance, at three eccentricities on the horizontal meridian (top to bottom graph 1, 2, and 4 deg, respectively). The thresholds for the single-character presentation are shown as thin horizontal lines; the error bars on the corresponding data point show the mean for all the data points in that subgraph.
