Figure S2. Response of two example FEFsem neurons across trials. A1: Firing rate across trials within LF block. Linear fit: $R^2 = 0.001, p = 0.88$. A2: Same conventions as A1, but for LF_{maint}. Linear fit: $R^2 = 0.321, p < 0.001$. B1-2: Same conventions as A. B1: Linear fit: $R^2 = 0.246, p = 0.01$. B2: Linear fit: $R^2 = 0.018, p = 0.51$.
